Abstract Topics

Present at ESPID 2025 across a range of PID abstract topics.

Abstract Topics

- Antimicrobials
 - Novel antimicrobial treatments
 - Resistance
 - Pharmacology
 - Antibiotic Stewardship
 - New Treatment Approaches
- Anti-Fungal
- Anti-Viral
- Public health and epidemiology (only non SARS-CoV2 content)
 - Population studies and surveillance
 - Modelling studies
- Vaccines (only non SARS-CoV2 content)
 - Maternal Vaccines
 - Passive Immunization
 - Vaccine development (phase 1-2) viral
 - Vaccine development (phase 1-2) bacterial and all non-viral
 - Vaccine efficacy (phase 3) and effectiveness viral
 - Vaccine efficacy (phase 3) and effectiveness –
 bacterial and all non-viral
 - Vaccine safety (post licensure)
 - Vaccine hesitancy
- Immunology & compromised host
 - Host-pathogen interaction
 - Host response diagnostics and imaging
 - Infections in oncology and HSCT
 - Infections in primary immunodeficiencies
 - Infections in solid organ transplants

- Severe/systemic fungal infections
- Vaccines in immunocompromised patients

Global health

- Climate change
- Emerging infections
- Refugees and migrants
- Tropical/parasite infections & travel medicine
- Vector-borne
- Zoonosis

Infections in early life

- Congenital CMV
- Neonatal sepsis
- Other congenital and perinatal infections

Non-respiratory infections

- Gastrointestinal infections Hepatitis
- Urogenital infections
- CNS infections
- Sepsis, systemic and multi-organ infections
- Skeletal infections
- Skin Infections
- STDs

Respiratory infections (only non-SARS-CoV2 content)

- Viral respiratory infections
- Bacterial pneumonia
- ENT infections

Mycobacteria and retroviruses

- Tuberculosis and other mycobacterial infections
- HIV/AIDS

Digital tools and machine learning

- Decision support tools
- Artificial intelligence in microbiology and radiology
- Telemedicine
- Diagnostics and Biomarkers
- Health associated infections, Infection prevention and Control
- COVID 19 and MIS-C

- Microbiome
- Prolonged/recurrent Fever
- Kawasaki and Inflammatory Syndromes
- Medical Education
- Environmental Impact on Infectious Diseases
- Global Health and Sustainability
- Other
