ESPID Early Career Opportunities

Build your career, take your research to the next level and improve your clinical practice throughout the year with these ESPID opportunities:

The Walter Marget Workshop (WMW) is over 2 half-days for trainees held every year in the days leading upto the ESPID Annual Meeting. This clinically-oriented educational workshop focuses on the diagnosis and management of infectious diseases in children. There are four talks by well-known experts, as well as small-group interactive case discussions with close interactions between trainees and faculty. Learn More The ESPID Research Masterclass (ERMC) is a closed, seminar type of forum for active paediatric infectious diseases (PID) research groups in Europe. The research performed can involve 'benchtype' basic and translational research, as well as 'bed-side' clinical studies (e.g. observational, case-control, randomized controlled, interventional) and epidemiological studies in any area of paediatric infectious diseases.

The format of ERMC is well suited for presenting work-in-progress as well as studies that have completed. You will gain feedback and input from other research groups, as well as senior research leaders in paediatric infectious diseases, on how to approach the research question, on study design and on presentation and interpretation of results. Learn MoreBring your research, cases, and reviews to Bucharest to share your work with the world. Submit HereThe award will offer you free participation, and cover your travel expenses to Bucharest as well as your hotel stay during the meeting days. Apply Here

The Young ESPID Symposium is a debate where both speakers and coordinators are Young ESPID members.

Watch 2022's Young ESPID Symposium

Furthermore you can joing Young ESPID — a group of members who are in training and early career or have completed training to become a paediatric infectious disease specialist <3 years ago.

There are many more early career opportunities on the **ESPID** website

But the ESPID Annual Meeting is where all journeys begin!
